# Dallas-Fort Worth Area Employment — August 2019

Total nonfarm employment in the Dallas-Fort Worth-Arlington Metropolitan Statistical Area stood at 3,810,900 in August 2019, up 115,800 over the year, the U.S. Bureau of Labor Statistics reported today. From August 2018 to August 2019, local nonfarm employment rose 3.1 percent compared to the national rate of 1.4 percent. (See chart 1 and table 1.) Assistant Commissioner for Regional Operations Stanley W. Suchman noted that among the 12 largest metropolitan areas in the country, Dallas ranked first in the annual rate of job growth and second in the number of jobs added over the year. (See chart 3 and table 2; the Technical Note at the end of this release contains the metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

Chart 1. Total nonfarm employment, over-the-year net change in the Dallas metropolitan area and its divisions, August 2014–August 2019

The Dallas-Fort Worth-Arlington Metropolitan Statistical Area consists of two metropolitan divisions – separately identifiable employment centers within the larger metropolitan area. The Dallas-Plano-Irving Metropolitan Division, which accounted for 72 percent of the area's workforce, added 100,300 jobs from August a year ago, an increase of 3.8 percent. The Fort Worth-Arlington Metropolitan Division, which accounted for the remaining 28 percent of the area's workforce, added 15,500 jobs during the 12-month period, a gain of 1.5 percent.

# **Industry employment**

Professional and business services added 28,100 jobs in the area from August 2018 to August 2019, the largest gain of any local supersector. The Dallas-Fort Worth-Arlington area's 4.5-percent annual rate of job growth in this supersector was more than double the U.S. increase of 2.1 percent. (See chart 2.) The Dallas-Plano-Irving division was responsible for the local area's job gains in this sector, up 33,900, while the Fort Worth-Arlington division lost 5,800 jobs over the year.

Dallas-Fort Worth-Arlington added 15,300 jobs in leisure and hospitality from August 2018. The local 3.9-percent annual growth rate compared to the national increase of 1.8 percent. Employment growth occurred primarily in the Dallas-Plano-Irving metropolitan division, adding 13,400 jobs, a 5.0-percent gain.

Trade, transportation, and utilities, the metropolitan area's largest supersector, added 14,900 jobs from August 2018 to August 2019. The 1.9-percent rate of local job growth compared to the national gain of 0.3 percent. Locally, employment rose in all three sub-sectors: transportation, warehousing, and utilities (+7,200); wholesale trade (+6,200); and retail trade (+1,500). Both metropolitan divisions added jobs over the year.

Mining, logging, and construction added 14,700 jobs locally, a 6.6-percent gain over the year. The Dallas-Plano-Irving metropolitan area added jobs at a faster pace than the Fort Worth-Arlington area, as employment in this sector expanded 8.4 percent and 3.0 percent, respectively.

Financial activities added 14,000 jobs from August 2018 to August 2019. The local 4.6-percent rate of annual growth compared to the national rate of 1.3 percent. Locally, employment also rose at a 4.6-percent pace in both Fort Worth-Arlington and Dallas-Plano-Irving.

Employment was up 12,600 over the year in education and health services in Dallas-Fort Worth-Arlington. The area's 2.8-percent rate of job growth compared to the U.S. rate of 2.5 percent. Both metropolitan divisions gained jobs over the year.

Chart 2. Total nonfarm and selected industry supersector employment, over-the-year percent change, United States and the Dallas-Fort Worth-Arlington metropolitan area, August 2019

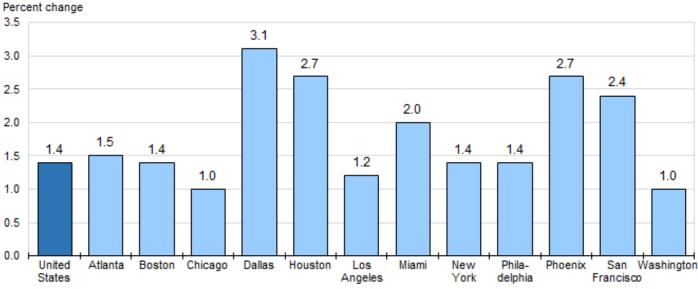

Source: U.S. Bureau of Labor Statistics.

Three other local sectors had annual job gains ranging from 6,700 to 4,100 from August 2018 to August 2019: manufacturing (+6,700), government (+6,300), and other services (+4,100).

# **Employment in the 12 largest metropolitan areas**

Dallas-Fort Worth-Arlington was 1 of the nation's 12 largest metropolitan statistical areas in August 2019. All 12 areas had over-the-year job growth during the period, with the rates of job growth in 6 areas exceeding the national average of 1.4 percent. Dallas had the fastest rate of job growth, up 3.1 percent, followed by Houston-The Woodlands-Sugar Land and Phoenix-Mesa-Scottsdale (+2.7 percent each). Chicago-Naperville-Elgin and Washington-Arlington-Alexandria had the slowest annual rates of job growth (+1.0 percent each), followed by Los Angeles-Long Beach-Anaheim (+1.2 percent). (See chart 3 and table 2.)

Chart 3. Total nonfarm employment, over-the-year percent change, United States and 12 largest metropolitan areas, August 2019

Source: U.S. Bureau of Labor Statistics.

New York-Newark-Jersey City added the largest number of jobs over the year, 134,200, followed by Dallas with 115,800 jobs. Washington had the smallest employment gain over the year, adding 33,600 jobs, followed by Boston-Cambridge-Nashua with 39,600 jobs. Annual gains in the remaining eight metropolitan areas ranged from 81,900 in Houston to 41,500 in Philadelphia-Camden-Wilmington.

Over the year, education and health services added the most jobs in seven areas: Boston, Chicago, Los Angeles, Miami-Fort Lauderdale-West Palm Beach, New York, Philadelphia, and Phoenix. Professional business services added the most jobs in three areas: Dallas, Houston, and San Francisco-Oakland-Hayward. Leisure and hospitality was the leading job producer in Atlanta-Sandy Springs-Roswell and Washington.

The information sector recorded the largest employment loss in five areas since August 2018: Chicago, Dallas, Houston, Miami, and Phoenix. The trade, transportation, and utilities sector lost the most jobs in Boston, Philadelphia, and Washington.

Metropolitan area employment data for September 2019 are scheduled to be released on Friday, October 18, 2019, at 10:00 a.m. (ET).

### **Technical Note**

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2017 version of the North American Industry Classification System.

**Method of estimation.** CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a "weighted link relative" estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month's employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, the sample of establishments is very small or highly variable. In these cases, a model-based approach is used in estimation. These models use the direct sample estimates (described above), combined with forecasts of historical (benchmarked) data to decrease volatility in estimation. Two different models (Fay-Herriot Model and Small Domain Model) are used depending on the industry level being estimated. For more detailed information about each model, refer to the BLS Handbook of Methods.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates. The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

**Employment estimates.** Measures of sampling error for the total nonfarm employment series are available for metropolitan areas and metropolitan divisions at www.bls.gov/web/laus/790stderr.htm. Measures of sampling error for more detailed series at the area and division level are available upon request. Measures of sampling error for states at the supersector level and for the private service-providing, goods-producing, total private and total nonfarm levels are available on the BLS website at www.bls.gov/web/laus/790stderr.htm. Information on recent benchmark revisions is available online at www.bls.gov/web/laus/benchmark.pdf.

**Area definitions.** The substate area data published in this release reflect the delineations issued by the U.S. Office of Management and Budget, dated April 10, 2018. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

The **Dallas-Fort Worth-Arlington Metropolitan Statistical Area** includes Collin, Dallas, Denton, Ellis, Hood, Hunt, Johnson, Kaufman, Parker, Rockwall, Somervell, Tarrant, and Wise Counties in Texas.

The **Dallas-Plano-Irving Metropolitan Division** includes Collin, Dallas, Denton, Ellis, Hunt, Kaufman, and Rockwall Counties in Texas.

The **Fort Worth-Arlington Metropolitan Division** includes Hood, Johnson, Parker, Somervell, Tarrant, and Wise Counties in Texas.

### **Additional information**

More complete information on the technical procedures used to develop these estimates and additional data appear in Employment and Earnings, which is available online at <a href="https://www.bls.gov/opub/ee/home.htm">www.bls.gov/opub/ee/home.htm</a>. Industry employment data for states and metropolitan areas from the CES program are also available in the above mentioned news releases and from the BLS website at <a href="https://www.bls.gov/sae/">www.bls.gov/sae/</a>.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
